

Insignia Technology Services, LLC Selected to Partner with the Department of Veterans Affairs in Support of the VA's Total IT Service Solutions and Modernization Program

Newport News, August 1, 2016 – Insignia Technology Services, LLC (Insignia) is honored to have been selected to partner with the Department of Veteran's Affairs (VA). Insignia will provide Information Technology (IT) Services and Solutions under the **Transformation Twenty-One Total Technology Next Generation (T4NG)** acquisition program. T4NG is a 10 year, multiple-award, indefinite delivery/indefinite quantity contract with a **ceiling value of \$22.3 billion**.

Insignia is proud to continue its valued partnership with the VA and to continue to serve and support the millions of Veterans who depend on VA's services and benefits. Under T4NG, **Insignia's Team** will provide IT services, including project management; strategic planning; enterprise architecture; systems/software engineering; enterprise network engineering; cybersecurity; and other health related IT requirements.

"Insignia has had the privilege of providing information technology solutions to the Department of Veterans Affairs for the last 5 years under the Veterans Relationship Management (VRM) contract. We are proud to continue this partnership under the T4NG program. Insignia is dedicated to delivering innovative, effective IT and health solutions, in support of our esteemed Veterans." Fred O'Brien, Insignia President and CEO.
