

# Insignia Technology Services Announces the Ribbon-Cutting Ceremony for the new Denver VA Hospital

This past weekend, the Department of Veterans Affairs held the ribbon cutting ceremony for the long-awaited opening of the Rocky Mountain Regional VA Medical Center in Aurora, Colorado. Insignia is proud to be a part of the transition from the decommissioning hospital to the new facility, providing IT assistance through an all-vet team to retire the old workstations and setup the new equipment for the VA Medical Staff. Their tireless efforts are applauded as we work to improve the lives of vets!
